## PROFESSIONAL SUMMARY

Software developer skilled in React, Angular and Node.js, with real-world experience building healthcare and business platforms. Delivers scalable code in fast-paced Agile teams.

## TECHNICAL SKILLS

**Programming languages:** JavaScript, TypeScript, HTML5, CSS.

**Frameworks and libraries:** React, Angular, React native, Next.js, Node.js , Ruby on Rails.

**Databases:** MongoDB, PostgreSQL.

Version Control: Git, GitHub.

**Work methods:** Agile, Scrum.

## EXPERIENCE

**DabaDoc**, Casablanca, Morocco

March 2024 - Present

*Full-stack developer*

- Led the modernization of the patients app, migrating from a Rails-integrated frontend to an Angular application setting architecture, improving performance and maintainability.
- Contributed to the launch of DabaDoc Corporate, delivering customized telehealth solutions for enterprise clients.
- Collaborated in Agile sprints, driving a 25% increase in delivery speed through improved task ownership, code reviews, and cross-functional coordination.

## PROJECTS

[app.dababoc.com](http://app.dababoc.com) – DabaDoc Patients App

Standalone Angular app for patient medical appointment booking and teleconsultations.

**Tech Stack:** Angular, Ruby on Rails, AWS

- Rebuilt the frontend architecture and implemented responsive UI components.
- Enhanced the teleconsultation experience by improving video call reliability and accessibility, boosting user satisfaction for both doctors and patients.

[connect-dababoc.com](http://connect-dababoc.com) – DabaDoc Connect (Doctors Portal)

B2B platform for clinics and doctors to manage patients, appointments, and video consults.

**Tech Stack:** Angular, Ruby on Rails, AWS

- Contributed to backend features, including patient record management and scheduling tools.

[DabaDoc.com](http://DabaDoc.com) – Public Doctor & Clinic Profiles

Public-facing platform for browsing doctor/clinic profiles and booking video, in-clinic, or home appointments.

**Tech Stack:** Ruby on Rails, AngularJS, MongoDB, CoffeeScript, PWA, AWS

- Contributed to responsive UI enhancements for a seamless cross-device experience.

[Mahaal.ma](http://Mahaal.ma) – Business Invoice Management App

Internal app for small businesses to manage clients, orders, products and invoices.

**Tech Stack:** TypeScript, ReactJS, Node.js, Postgres, AWS .

- Developed full-stack features covering the workflow from order creation to paid invoice generation.
